## “A Few Of My Current Favorite Curiosities”

Dr. John Mallinckrodt

Professor of Physics  
Cal Poly Pomona

### Abstract:

Asymmetrically sticking spheres, whip dynamics, and how to tour the universe in comfort are a few of my current favorite curiosities. The world of "well-understood physics" is replete with surprising and, in fact, NOT very well known physical phenomena. I will share the results of a few recent explorations that involve nothing more than careful applications of elementary physics.
