

Physics Department Seminar

Friday April 16th, 2004

11:00am in PhSc 106 – Note Room Change

“Design Aspects of Kite

Flight Envelopes”

Mr. Titus Roff
Department of Physics
California State University, Chico

Abstract:

Most of us have flown kites. After studying physics, I have found myself wondering how the design of the kite affects its flight. Join us as I go over some aspects of kite design and demonstrate how they affect the flight envelope.
