Friday April 11<sup>th</sup>, 2008

11:00am in PhSc 108

## “The Role of Biomedical Physics in Medicine and Neurosciences”

Dr. Amir Huda  
Biomedical Physics Program  
California State University Fresno

### Abstract:

What is Biomedical Physics? This talk will focus on the burgeoning field of Biomedical Physics and its role in diagnosing and treating diseases and disorders. It will explore its historical origin and the newer subspecialties including molecular imaging, magnetic resonance spectroscopy, and the newer treatment options for cancer.
