

# Physics Department Seminar

Friday April 26<sup>th</sup>, 2013

11:00am in PhSc 105

## “Quantum Computers”

Mr. Justin Baran  
Physics Major  
CSU Chico

### Abstracts:

Quantum Mechanics provides a new way to perform complex computations. This type of computation differs significantly from the methods used in classical computers. Quantum logic gates and circuits will be discussed, as well as the physical obstacles to building a working device utilizing these concepts.
