Friday April 11<sup>th</sup>, 2014

3:00pm in Physical Science 105

## “NASA’s Triana Mission”

### Mr. Jonathan Langone

Physics Major

CSU Chico Department of Physics

#### Abstract:

A scientific and politically captivating story of NASA’s attempt to launch a space and earth weather satellite. It will be a discussion of the rise and fall of the satellite’s development since the early 2000’s, as well as the physical aspects of its Lagrange-1 orbit, instruments used for its main objectives of the mission, and usefulness of the data collected.
